

All in one system

Modular 1m x
0.5m

Easy to handle/install

Lightweight

49k (saturated weight) on a 50mm substrate

Removable

Simply unclip to access roof below

Environmental

**80% post industrial polyethylene 100% recyclable
Manufacturer's warranty 15 years**

Shallow or deeper planting options

Min 50mm substrate up to a metre in depth

Pre-grown

Fully planted for complete plant coverage or 'plant in place'

Minimal maintenance

Check 4 times per year for self-seeded plants

Fast installation

Can be hours only depending on outlets/detailing

Major Benefits

Stormwater retention/mitigation

Up to 90% on an average rainfall event

Significant energy savings

The effect of evapo-transpiration from the plants cools the environment and reduces heat gain internally saving on air-conditioning costs

Extend
waterproofing life

Up to 3 times the life because the UV rays can't get through to the membrane and the temperature of the roof is more constant rather than peak heating and cooling with the seasons.
